

PTFE/TFM Skived and Etched Sheet

Feature:

With our special technology, we create the “**BIGGEST PTFE/TFM BILLET**”. So we supply the “**BIGGEST DIMENSION of PTFE/TFM SKIVED SHEET**”. Wider and longer PTFE/TFM sheet provides less welding and cutting loss and more advantages for further fabrications.

Furthermore, we develop the new etching process and able to treat one side or both sides. PTFE/TFM sheet is able to be glued with adhesive and bonding on the surface of different materials.

Material property:

Item	Specific Gravity	Elongation (%)	Tensile Strength (kgf/cm ²)
Test Method	ASTM D792	ASTM D638	ASTM D638
PTFE	2.15~2.18	200~400	210~350
TFM	2.16~2.19	300~650	250~350

Specification:

Thickness (mm)	Thickness Tolerance	Width (mm)	Width Tolerance (mm)
0.25	+10% , - 0	1,200 1,500	+20, - 0
0.5			
0.75			
1.0			
1.5		1,200 1,500 1,700 2,000	
2.0			
2.5			
3.0			
4.0			
5.0			
6.0			

※ Special thickness and width are available upon request.
